

Head Swelling

1

Keep her quiet and calm by wrapping her in a blanket to keep her warm

2

If she loses consciousness elevate her head to help blood flow and relieve or reduce any pressure in the head

3

Rinse a clean washcloth in cold water and hold it against the swollen area and place an ice pack for 15 min on and 15 min off

4

Consult a vet as soon as possible.

Keep an eye on your cat if symptoms increase consult your vet

Head swelling can occur from an allergic reaction from a bee sting or bite allergy
