

Tar On Fur

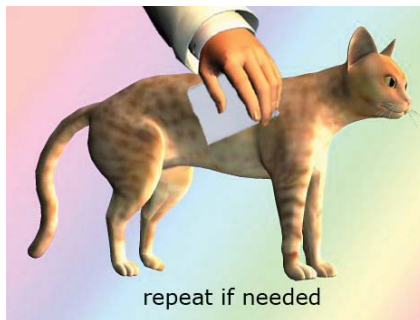

1

Soften the tar by placing Crisco or Petroleum Jelly on it

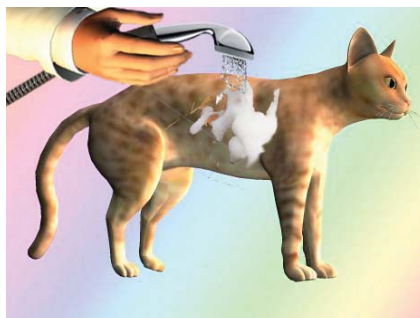

2

Wipe it off with paper towels

3

Repeat several times if needed

4

Wash your cat thoroughly with soap and water

Tar can be difficult and sticky to remove but it can come out, try to wear rubber gloves to protect it sticking to you

You may need to let the Crisco or petroleum jelly soak for several min to make sure the tar softens up completely
