

Head Entrapment Fence - Rails

1 Calm your dog down to prevent him from struggling further

Make sure that you muzzle your dog as he may try to bite you when you have to push him through the fence or rails

It helps if someone stays behind him the entire time to prevent him from backing up while you try to free him

A dog's head is narrower from top to bottom than side to side

2 Place yourself behind the dog and push him closer to the object that he's trapped in to avoid him backing up further and strangling himself

3 You may want to muzzle him to prevent him from biting you while you try to free him

4 Grease the fur on his neck and the top of his head with KY Jelly or Petroleum Jelly

5 While someone holds his from the back you should gently take the dogs muzzle and turn his head sideways and slide him through the fence or rails
