

## Poison - Alkalis Ammonia, Detergents

**1** Try to identify the toxic substance collect any empty bottles or containers, and check for distinctive odors

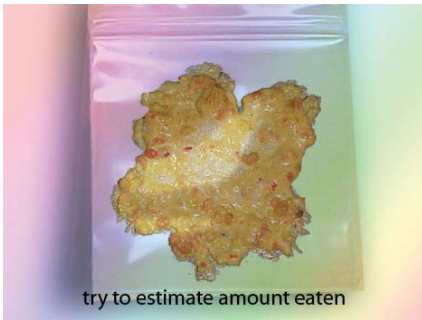

**6** If the skin was exposed then flush the area with running cool water for 30 minutes

**2** Look for traces in or around the mouth to identify the substance

**7** Call the ASPCA Animal Poison Control Center hotline which operates 24 hours a day, 7 days a week, at (888) 426-4435 there is a \$60 consultation fee, payable by credit card, for this service and this includes follow-up consultation should you or your vet need further assistance with your pet's case

**3** If your dog vomits, note carefully the appearance of the vomit and collect them in a plastic baggy for identification

- DO NOT induce vomiting or give activated charcoal
- Wear gloves while helping your dog to avoid contact with the acid
- If your animal is having seizures, losing consciousness, is unconscious or is having difficulty breathing, telephone ahead and bring your pet immediately to your local veterinarian or emergency veterinary clinic
- Note any symptoms that your pet may be having
- ASPCA Animal Poison Control Center hotline which operates 24 hours a day, 7 days a week, at (888) 426-4435

**4** Try to estimate the amount that the pet has eaten. Some things are only toxic in large doses

**5** If the eye was exposure flush eyes with water or sterile saline for 30 minutes.
