

1 Clean the wound immediately with soap and running water for 5 minutes or more to wash out any contaminants.

2 Put a sterile bandage or clean dry cloth over the wound. If it is bleeding, apply pressure to the wound for 5 minutes or until the bleeding stops.

3 Seek medical attention promptly as a serious infection can develop.

DO NOT put medication, antiseptics, or home remedies on the wound

If some skin tissue, such as a part of an ear or nose, is bitten off, bring it to the hospital emergency department or doctor's office with the person
